

# **APPENDIX G**

## **STANDARD MEANINGS OF DECLARED PLANT CATEGORIES**

## **Appendix G: Details of Standard Meanings of Declared Plant Categories**

### **Landholder obligations for the control of Cape tulip**

#### **P1**

Prohibits movement

The movement of plants or their seeds is prohibited within the State.

This prohibits the movement of contaminated machinery and produce including livestock and fodder.

#### **P2**

Aim is to eradicate infestation

Treat all plants to destroy and prevent propagation each year until no plants remain. The infested area must be managed in such a way that prevents the spread of seed or plant parts on or in livestock, fodder, grain, vehicles and/or machinery.

#### **P3**

Aims to control infestation by reducing area and/or density of infestation

The infested area must be managed in such a way that prevents the spread of seed or plant parts within and from the property on or in livestock, fodder, grain, vehicles and/or machinery.

Treat to destroy and prevent seed set all plants:-

- \* Within 50 metres inside of the boundaries of the infestation
- \* within 50 metres of roads and highwater mark on waterways
- \* within 50 metres of sheds, stock yards and houses.

Treatment must be done prior to seed set each year.

Properties with less than 20 hectares of infestation must treat the entire infestation.

Additional areas may be ordered to be treated.

#### **P4**

Aims to prevent infestation spreading beyond existing boundaries of infestation

The infested area must be managed in such a way that prevents the spread of seed or plant parts within and from the property on or in livestock, fodder, grain, vehicles and/or machinery.

Treat to destroy and prevent seed set all plants:-

- \* within 50 metres inside of the boundaries of the infested property for one-leaf and 20 metres for two-leaf
- \* within 50 metres of roads and highwater mark on waterways
- \* within 50 metres of sheds, stock yards and houses.

Treatment must be done prior to seed set each year. Properties with less than 20 hectares of infestation must treat the entire infestation.

Additional areas may be ordered to be treated.

#### Special considerations

In the case of P4 infestations where they continue across property boundaries there is no requirement to treat the relevant part of the property boundaries as long as the boundaries of the infestation as a whole are treated. There must be agreement between neighbours in relation to the treatment of these areas.
